

Example: Econometrica 形式

Shiro Takeda

`$Id: econometrica.tex,v 1.1 2006/04/22 09:30:54 st Exp $`

`econometrica.bst` を使った例。Econometrica 形式の reference になります。

一緒に `natbib.sty` を使ってます。普通の経済学っぽい citation の形式になります。

Brander and Krugman (1983), Helpman and Krugman (1985), Baldwin and Krugman (1988), Helpman and Krugman (1989), Brezis, Krugman, and Tsiddon (1993), Fujita, Krugman, and Venables (1999), Krugman and Obstfeld (199?), Baldwin and Krugman (2000), Krugman and Obstfeld (2000),

一気に沢山 cite。同じ著者のならカンマで区切ってそのまま並べればよし。

Krugman (1979, 1980, 1981, 1984, 1987a,b, 1991a,b,c, 1993, 1996, 2000).

ちなみに、Reference で一番上にある Baldwin and Krugman (1988) が `BIBTEX` のデータベースでどう登録されてるかというと、

```
@InCollection{baldwin88:_market_acces_inter_compet,
  author =      {Richard E. Baldwin and Paul R. Krugman},
  title =       {Market Access and International Competition: A
                 Simulation Study of {16K} Random Access Memories},
  booktitle =   {Empirical Methods for International Trade},
  publisher =   pu-MIT,
  year =        1988,
  editor =      {R. Feenstra},
  address =     ad-MIT
}
```

こんな感じになっています。このようにデータベースでは項目毎に箇条書きで登録しておくだけです。`BIBTEX` はこれを自動的に Reference 部分のような複雑な形式に加工してくれるというわけです。
